CLAS

A Web Application for Computer Laboratory Accountability Slip

THE PROBLEM
- Manual logbooks
- Unclear accountability
- Lost records
- Slow damage reporting

THE SOLUTION
- Digital login system
- Automated accountability
- Real-time monitoring
- Centralized records

CLAS is a desktop and web-based system that records computer usage, generates accountability slips, and allows real-time monitoring of laboratory activities.

LOGIN | SESSION RECORDED | SLIP GENERATED | ADMIN MONITORS | ISSUE REPORTED

- Secure User Authentication
- Automatic Accountability Slips
- Real-Time Monitoring Dashboard
- Centralized Records
- Issue Reporting System

- Highly Acceptable (ISO/IEC 25010)
- Fast and Reliable Performance
- Secure and User-Friendly
- Reduces Equipment Loss

.NET

CLAS modernizes computer laboratory accountability by promoting responsibility, transparency, and efficiency in education.
